

FCE ASM 2010 – TENTATIVE AGENDA
 March 15-16, 2010
 Marine Science Building (MSB), Room 150
 Florida International University - Biscayne Bay Campus

Responding to our Mid-Term Review

This year's ASM will focus on responding in break-out group format to comments from our mid-term review last October. Four break-out group topics have been identified prior to the meeting, but there will be opportunity for other groups to form and meet during the meeting. To prepare for the ASM, please read our [mid-term review](#) and the summaries of each of the four break-out groups listed below. Also be thinking about ways that you can contribute to one or more groups, and bring any materials with you that you think would constructively contribute to discussions.

1. [An Analytical Framework for FCE –Trexler](#)
2. [Heuristic Model Development – Saunders/Saha](#)
3. [Human Dimensions and Water – Ogden/Price](#)
4. [Community ecology, stoichiometry- Jaffe'/Heithaus/Rivera-Monroy](#)

Tentative Schedule

Monday, March 15, 2010			
9:00-9:30	Breakfast		Outside MSB 150
