

FCE ASM 2014 – TENTATIVE AGENDA

FCE III – Integration & Synthesis

This year's ASM will focus on (1) integrating and synthesizing FCE III working group research, and (2) preparing for our third year review next year. Some breakout group topics have been identified prior to the meeting, but there will be opportunity for other groups to form during the meeting. To prepare, please reread the FCE III proposal and 2014 annual report and be ready to contribute to discussions.

Mon, March 10
